

Carlos Lopez

Software Developer (React, Node.js, Python) | Toronto, ON

carloslopezr29@gmail.com | carloslopezdev.com | linkedin.com/in/carloslopezdev | 647-550-8452

Summary

Full-stack developer with over 2 years of experience building applications with Python, Node.js and Google Cloud (Firebase Cloud Functions). Sole engineer who shipped a service marketplace app used by 100+ users, with experience in API design, payments, security, automated testing, and performance optimization.

Experience

Full-Stack Developer, LatinoLink – Toronto, ON | Case study Feb 2026 – Present

- Shipped a Flutter-based service marketplace app to App Store and Google Play, onboarding 100+ users
- Built payment processing for in-app purchases using RevenueCat webhooks, idempotency keys and atomic Firestore transactions to prevent duplicate or lost credits and subscriptions
- Secured user and transaction data against IDOR, mass assignment, and privilege escalation via default-deny, role-based Firestore rules, validated by 81 automated security tests (63 negative cases)
- Redesigned provider matching algorithm to cut database calls from 201 to 2, reducing query load and cost
- Localized client screens into Spanish, English and French with an in-app language switcher

Full-Stack Developer, Xeo Marketing and Strategic Consultancy – Toronto, ON Nov 2025 – Sep 2026

- Built a summit site for 500+ attendees with CSS animations and an integrated ticket purchase flow
- Routed 40 leads into the client CRM with JavaScript validation and Gravity Forms REST API integration
- Developed 26 WordPress pages for marketing campaigns with technical SEO, AEO and structured data

Backend Developer, Shipd – Toronto, ON Nov 2024 – Sep 2025

- Expanded a Large Language Model training dataset by developing and refactoring 50+ Django, Flask, and PyQt projects, improving code completion accuracy by 25% (Pass@1)
- Improved a Django language-learning application's user-facing API latency by 95.4% (3.18s → 145ms) by implementing Celery Beat with Redis task queues to asynchronously pre-generate OpenAI-powered lessons

Web Development Intern, rCycle – Toronto, ON May 2024 – Sep 2024

- Migrated the dev team's WordPress test environment to AWS EC2 and automated user onboarding in JS/PHP

Projects

Creceer Mexico | crecermexico.org | Django, JavaScript, Stripe, Google Maps API Jul 2025

- Proposed, designed, and built a responsive full-stack web app to replace outdated static site
- Implemented the organization's first secure online donation system through Stripe webhooks
